

Official Erratum: Standard E-02, Receiving Screening

ERRATA ID: 2026.02 | NOTIFICATION DATE: September 18, 2026

Purpose: Errata are revisions issued after Publication of an NCCHC *Standards* manual to address identified errors in the published document. Errata are intended to ensure that the published manual accurately reflects the standards and compliance indicators. Errata clarify or correct the published document so that it accurately reflects the approved *Standards*.

Once an erratum is formally published by NCCHC, the corrected language becomes the applicable requirement, and facilities will be surveyed using the revised language from the reported effective date forward. The published erratum is considered part of the applicable edition of the NCCHC *Standards* Manual.

Effective Date	October 1, 2026	
Affected Manuals	2026 <i>Standards for Health Services in Prisons</i>	
Standard	E-02 Receiving Screening	
Reason for Change	The originally published language stated incorrect timing for completing a mandatory latent tuberculosis screening test.	
Action Required	Print this notice and add it to your manual(s). Electronic <i>Standards</i> will be updated by NCCHC and will reflect the corrected text detailed below.	
Summary of Change(s) Made		
Location of Change(s)	Original Text	Corrected Text (Deletions in strikethrough ; New text is <u>underlined</u>)
• Standard E-02 Receiving Screening • Compliance Indicator #8 • Page 125	8. A screening test for latent tuberculosis is completed (for example, PPD tuberculin skin test, chest X-ray, laboratory test) during the receiving screening encounter.	8. A screening test for latent tuberculosis is completed (for example, PPD tuberculin skin test, chest X-ray, laboratory test) during the receiving screening encounter <u>within 7 days of admission to the facility.</u>
